

In order to accelerate the opening of the telecom market, by introducing the competition and fostering the application of new technologies, the Republic Telecommunication Agency hereby launches a

### **Public call**

For registration of persons using or interested in using fixed wireless access services in **3.4 – 3.6 GHz and 3.6 – 3.8 GHz** bands for service provision.

With the purpose of regulating the telecom market and rational usage of radio-frequency spectrum, the persons using or interested in using fixed wireless access services in **3.4 – 3.6 GHz and 3.6 – 3.8 GHz** bands for service provision are hereby invited to apply for registration with the Republic Telecommunication Agency.

After the data are collected, pursuant to the Strategy for the Development of Telecommunications, the Republic Telecommunications Agency shall propose an optimal solution for the usage of this frequency band.

The persons using fixed wireless access services in **3.4 – 3.6 GHz and 3.6 – 3.8 GHz** bands for service provision, need to submit the following:

1. Name and address of the person providing the service;
2. Name and surname of the person in charge and contact person, telephone, e-mail;
3. Technical solution – list of base stations with addresses, operation mode (FDD,TDD, combination), number of sectors, number of channels per sector and frequencies;
4. Type and area of service provision;
5. Number of users;
6. Information on the time when the service provision began;
7. Documentation on the basis of which the service provision began.

The persons interested in using fixed wireless access services in 3.4 – 3.6 GHz and 3.6 – 3.8 GHz bands for service provision, need to submit the following:

1. Name and address of the person interested in using fixed wireless access;
2. Name and surname of the person in charge and contact person, telephone, e-mail;
3. Planned Services;
4. Area intended for service provision;
5. Planned number of base stations and number of channels per base station;
6. Planned number of users;
7. Expected time of network implementation, from the moment the license for frequency usage is issued.

The application deadline is 8 February 2008.

The documents are to be submitted to the following address:  
Republic telecommunication Agency, 11 000 Belgrade, Visnjiceva 8.
