

Pursuant to Article 102, paragraph 21, items 1)–12) of the Law on Electronic Communications (“Official Gazette of the Republic of Serbia”, No. 35/23, hereinafter: the Law), the Council of the Regulatory Authority for Electronic Communications and Postal Services, at its 42nd session of the fourth convocation held on November 13, 2024, hereby adopts this

## **Rulebook on the conditions for the assignment and use of radio frequency spectrum**

"Official Gazette of the Republic of Serbia", Nos. 91 of November 21, 2024, 80 of September 16, 2025, 118 of December 26, 2025.

### **I. Introductory provisions**

#### **Subject of Regulation**

##### **Article 1.**

This Rulebook regulates the conditions for the assignment and use of radio frequency spectrum; the manner, conditions and procedure for issuing, amending, restricting, extending and renewing individual licenses; individual license forms; the duration of individual licenses; the manner and conditions for the transfer of the right to use or the leasing of the radio frequency spectrum; the application form and relevant technical documentation attached to the application for issuing an individual license; the application form for issuing a temporary license; the manner and conditions for using radio stations in case of danger and in other emergency cases; the general procedure for conducting public bidding; the conditions that enable the shared use and installation of infrastructure and the shared use and access to the radio frequency spectrum; the manner and conditions for limiting the requirements of radio frequency spectrum use; the manner and conditions for mandatory identification of certain classes of radio stations; the method and conditions for registering radio stations, as well as the provision of technical and other data on certain classes of radio stations, when necessary for the purpose of protection against interference and the implementation of control over the use of the radio frequency spectrum.

### **II. PROCEDURE FOR ISSUING INDIVIDUAL LICENSES AND CONDITIONS FOR THE USE OF RADIO FREQUENCY SPECTRUM**

#### **1. Conditions for issuing an individual license based on a request**

##### **Article 2.**

The Regulatory Authority for Electronic Communications and Postal Services (hereinafter: the Regulator) shall issue an individual license for the use of the radio frequency spectrum

(hereinafter: individual license) based on the submitted application, if the following conditions are met:

1) if the application for the issuance of an individual license is submitted in accordance with the conditions for the allotment and use of the radio frequency spectrum, which are determined for the respective radio frequency or radio frequency channel in the relevant Radio Frequency Allotment Plan (hereinafter: Allotment Plan) and/or Radio Frequency Band Allocation Plan (hereinafter: Allocation Plan);

2) if the requested radio frequencies or radio frequency bands are available according to the database on the use of the radio frequency spectrum;

3) if the radio frequency or radio frequency band is harmonized with the use of radio frequencies and radio frequency channels in the Republic of Serbia, as well as with neighboring and other countries;

4) if the applicant has been selected by the Regulator based on a previously conducted public tender procedure referred to in Article 105, paragraph 11 of the Law;

5) if the applicant has been granted an individual license for analogue broadcasting pursuant to a decision of the authority competent for electronic media;

6) in terms of the protection of human health from exposure to non-ionizing radiation, in accordance with the principles of radio frequency spectrum management referred to in Article 98, paragraph 3, item 8) of the Law.

## **2. Application forms for issuing individual licenses**

### **Article 3.**

The application forms for issuing individual licenses in the procedure referred to in Article 104 of the Law, or the application form for issuing a temporary license in the procedure referred to in Article 107 of the Law, are provided in Annex 1, which is printed with this Rulebook and represents an integral part thereof.

The application for issuing an individual license referred to in paragraph 1 of this Article shall be accompanied by the appropriate technical documentation. The content of the technical documentation, depending on the type of radiocommunication service and other requirements relating to the preparation and manner of submission of the documentation, are provided in Annex 2, which is printed with this Rulebook and forms an integral part thereof.

## **3. Procedure for issuing an individual license based on a request**

### **Article 4.**

The Regulator shall issue an individual license based on the submitted application, when the Allocation Plan determines such a method of issuing an individual license within a certain radio frequency band.

The individual license referred to in paragraph 1 of this Article shall be issued by a decision and shall form an integral part thereof.

The decision on the request referred to in paragraph 1 of this Article shall be made in the order of submission, within 40 days from the date of receipt of the proper request

and payment of the fee calculated according to the request, except in cases where the relevant international agreements and international legal acts provide for a different deadline.

The request for issuing an individual license referred to in paragraph 1 of this Article shall be submitted to the Regulator electronically or in writing, depending on the available technical capabilities of the applicant, on the appropriate prescribed form.

The application forms referred to in paragraph 1 of this Article are given in Annex 1.

Along with the application referred to in paragraph 1 of this Article, the Regulator shall be provided with the prescribed technical and other documentation, depending on the type of radiocommunication service, and in accordance with Annex 2.

Along with the corresponding application for the issuance of an individual license, it is necessary, in addition to the technical documentation, to submit other documentation of importance for the Regulator's decision-making. A list of other documentation is given in the corresponding application form in Annex 1.

The Regulator shall determine the amount and method of payment of the fee in the procedure for issuing an individual license upon request, in accordance with the general act prescribing the amount and method of payment of fees for the provision of services within the competence of the Regulator.

The Regulator shall reject the request for issuing an individual license referred to in paragraph 2 of this Article if it determines that the conditions referred to in Article 2 of this Rulebook have not been met, and shall reject the request referred to in paragraph 2 of this Article if the request has not been duly completed within the deadline set by the Regulator and/or if the fee referred to in paragraph 8 of this Article has not been paid.

#### **4. Procedure for issuing a temporary license**

##### **Article 5.**

A temporary license may be issued for a radio station or radio system used for the purpose of market or technical testing of products and services, research or design, as well as for the purpose of holding sports, cultural, entertainment and other events of limited duration, in accordance with the provisions of Article 107 of the Law.

The request for the issuance of a temporary license shall be submitted on the prescribed form (ZPD), given in Annex 1.

The amount and method of payment of the fee in the procedure for issuing a temporary individual license shall be determined by the Regulator in accordance with the general act prescribing the amount and method of payment of fees for the provision of services within the competence of the Regulator.

In the case of using radio frequencies on the basis of a temporary license, which is issued for the purposes of holding sports, cultural, entertainment and other events of limited duration, the Regulator cooperates with the relevant authorities, organizations and other persons in the country, in order to get information about upcoming events, as well as the need to obtain an appropriate individual license.

#### **5. Individual license forms**

##### **Article 6.**

Individual license forms are given in Annex 3, which is printed with this Rulebook and represents an integral part thereof.

## **6. Content of individual license based on request**

### **Article 7.**

An individual license issued upon request shall contain data on:

- 1) the individual license holder;
- 2) the assigned radio frequencies, i.e. radio frequency spectrum;
- 3) locations, i.e. coverage areas;
- 4) the type of radiocommunication service;
- 5) data depending on the type of radiocommunication service;
- 6) duration of the individual license;
- 7) locations, i.e. coverage areas;
- 8) the amount of the fee for issuing an individual license, in accordance with the general act prescribing the amount and method of payment of fees for providing services within the competence of the Regulator;
- 9) the deadline for performing a technical inspection.

The individual license referred to in paragraph 1 of this Article may also contain other data, if such data are related to the prescribed conditions for issuing an individual license or arise from relevant international agreements.

The holder of an individual license is obliged to notify the Regulator of any change in the data referred to in paragraph 1, item 1) of this Article, within 30 days of the change, and to submit a request for the issuance of a new individual license.

The Regulator shall maintain an up-to-date register of issued individual licenses on its website.

## **7. Conditions for the use of radio frequency spectrum**

### **Article 8.**

The conditions for the use of the radio frequency spectrum, for which an individual license referred to in Article 102, paragraph 1, item 1) subitem (1) of the Law is issued, are determined in the individual license that is issued in the procedure referred to in Art. 104 and 107 of the Law, the content of which is prescribed in Article 7 of this Rulebook.

The conditions for the use of the radio frequency spectrum, for which an individual license referred to in Article 102, paragraph 1, item 1) subitem (2) of the Law is issued, contain obligations, a deadline for execution, as well as criteria for assessing the fulfillment of those obligations, and are determined in the individual license that is issued in the procedure from Article 105 of the Law, the content of which is prescribed in Article 23 of this Rulebook.

## **8. Duration and extension of the duration of the individual license**

### **Article 9.**

The duration of an individual license issued based on an application and granting the right to use the radio frequency spectrum, in accordance with the procedure referred to in Article 104 of the Law, may not exceed ten years.

The duration of an individual license, issued based on a public tender procedure and granting the right to use the harmonized radio frequency spectrum for wireless broadband electronic communications services, in accordance with the procedure referred to in Article 105 of the Law, is prescribed by the provision of Article 103, paragraph 2 of the Law.

The Regulator shall make a decision to extend the duration of an individual license issued on the basis of a public tender procedure, if the possibility of extension is provided for by a general act prescribing the minimum conditions for issuing individual licenses on the basis of a public tender procedure, taking into account the principles of proportionality, non-discrimination and transparency, in accordance with the provisions of Article 103, paragraphs 3-10 of the Law.

## **9. Renewal of individual license**

### **Article 10.**

The Regulator, ex officio or at the request of the holder of an individual license referred to in Article 105 of the Law, shall assess whether there is a need for renewal of this license, unless the renewal was explicitly excluded in the granting procedure.

The provisions of Article 109 of the Law shall apply to the renewal procedure of an individual license issued based on a public tender procedure.

### **Article 11.**

An individual license issued based on a request, in accordance with Article 104 of the Law, may be renewed at the request of the individual license holder, if the conditions set out in Article 2 of this Rulebook are met, and in the manner prescribed in the procedure set out in Article 4 of this Rulebook.

In the case referred to in paragraph 1 of this Article, the Regulator shall issue a new individual license to the individual license holder.

If the data from the issued individual license has not changed, which is confirmed by the individual license holder, it is not necessary to submit the technical and other documentation referred to in Article 4, paragraphs 6 and 7 of this Rulebook. In this case, the individual license holder is obliged to carry out a technical inspection within the specified period.

If the Regulator establishes that the conditions for issuing an individual license have changed, it shall ask the individual license holder to submit technical and other documentation in accordance with the changed conditions.

## **10. Manner and conditions for the transfer of the right to use or the leasing of the radio frequency spectrum**

### **Article 12.**

Radio frequency bands, for which the possibility of transfer or lease is envisaged, in accordance with the provisions of Article 106 of the Law, are determined in the Allocation Plan. The transfer of radio frequency spectrum requires the consent of the Regulator.

The holder of an individual license and the person to whom the radio frequency spectrum is transferred shall jointly submit to the Regulator a request for granting consent for the transfer of radio frequency spectrum, which shall contain:

- 1) the number of the individual license, which prescribes the conditions for the use of the radio frequency spectrum for which the application is submitted;
- 2) data on the holder of the individual license, which prescribes the conditions for the use of the radio frequency spectrum for which the application is submitted;
- 3) data on the person to whom the radio frequency spectrum is transferred;
- 4) data on the radio frequency spectrum for which the transfer is made;
- 5) evidence that the person to whom the radio frequency spectrum is transferred meets the conditions for the assignment, as well as evidence regarding the manner in which the conditions for the use of the radio frequency spectrum determined by the individual license, which prescribes the conditions for the use of the radio frequency spectrum for which the application is submitted, will be met;
- 6) and other data of importance in the decision-making process, at the request of the Regulator.

A request for consent for the transfer of the radio frequency spectrum cannot be submitted if a procedure for amending and/or restricting the conditions of use from the individual license, which prescribes the conditions for the use of the radio frequency spectrum for which the application for transfer is submitted is being conducted.

At the time of submitting a request for consent for the transfer of the radio frequency spectrum, all financial obligations arising from the individual license that is the subject of the request, and which prescribes the conditions for the use of the radio frequency spectrum, must be settled. Otherwise, the Regulator shall set a deadline within which the due obligations must be settled in order to meet the conditions for the transfer of the right to use the radio frequency spectrum.

In the procedure for resolving the request referred to in paragraph 2 of this Article, the Regulator shall take into account the protection of competition, deciding on the basis of an objective assessment of the conditions of competition in the market for the future period and the impact on existing and future investments, and in particular on investments for the establishment of an electronic communications network. In the procedure for resolving the request referred to in paragraph 2 of this Article, the Regulator shall cooperate with the authority responsible for the protection of competition in accordance with Article 33, paragraph 1, item 2) of the Law.

The Regulator shall reject the request referred to in paragraph 2 of this Article if it is not arranged within the deadline set by the Regulator, and shall reject the request if it establishes the existence of a reasonable doubt that the new individual license holder cannot meet the conditions referred to in paragraph 2, item 5) and 6) of this Article.

The transfer of radio frequency spectrum shall fully transfer the rights and obligations arising from the corresponding individual license, including the conditions for granting and using specified in that individual license.

The Regulator shall make a decision within 40 days from the date of submission of the proper request referred to in paragraph 2 of this Article. After granting consent, the Regulator shall issue new individual licenses, in accordance with the conditions of the transfer, and at the same time the existing individual license shall cease to be valid.

The Regulator shall determine the amount of the fee in the procedure for deciding and granting consent for the transfer of radio frequency spectrum, i.e. the fee for issuing new individual licenses, in accordance with the conditions of the transfer.

### **Article 13.**

The holder of an individual license, issued on the basis of a public tender procedure, i.e. the lessor, is obliged to notify the Regulator of its intention to lease the radio frequency spectrum, at least 30 days before the start of the lease period, as well as to submit a statement assuming responsibility for fulfilling all conditions for the use of the radio frequency spectrum being leased, which in particular contains:

- 1) the number of the individual license, which prescribes the conditions for the use of the radio frequency spectrum being leased;
- 2) information about the holder of the individual license, i.e. the lessor, which prescribes the conditions for the use of the radio frequency spectrum being leased;
- 3) information about the person to whom the radio frequency spectrum is leased, i.e. the lessee;
- 4) information about the radio frequency spectrum for which the lease is being made;
- 5) the duration of the radio frequency spectrum lease;
- 6) and other data of importance in the decision-making process, at the request of the Regulator.

During the lease of the radio frequency spectrum, the Regulator checks the lessor and the lessee for compliance with the conditions set out in the individual license.

## **11. Shared use and deployment of infrastructure and shared use and access to radio frequency spectrum**

### **Article 14.**

In accordance with the provision of Article 102, paragraph 13 of the Law, the Regulator may prescribe conditions that enable the holder of an individual license issued on the basis of a public tender procedure to:

- 1) share the use of the radio frequency spectrum, i.e. passive or active infrastructure necessary for the use of the radio frequency spectrum;
- 2) conclude a contract on national roaming on a market basis;
- 3) share the deployment of infrastructure for the provision of networks or services using the radio frequency spectrum.

The conditions referred to in paragraph 1 of this Article constitute the conditions for the use of the radio frequency spectrum and are an integral part of the individual license, which is issued based on a public tender procedure.

When determining the conditions referred to in paragraph 1 of this Article, the Regulator shall take into account the effectiveness and efficiency of the use of the radio frequency spectrum, taking into account the rules on the protection of competition,

which are governed by special regulations, as well as the conditions prescribed by the general act referred to in Article 105, paragraph 3 of the Law and other documentation in the public bidding procedure.

## **12. Method and conditions for restricting the requirements for using the radio frequency spectrum**

### **Article 15.**

The Regulator may exceptionally restrict the conditions for the use of radio frequency spectrum from an individual license, in accordance with the principles of proportionality and non-discrimination, if such restriction is necessary for the purpose of ensuring the effective and efficient use of radio frequency spectrum, taking into account technical measures adopted in accordance with the relevant European decisions on the regulatory framework for radio frequency spectrum policy, amendments to the Allocation Plan and Allotment Plans, international agreements and other international legal acts, taking into account that such restriction is the least burdensome for the holder of the individual license.

The Regulator, in the cases referred to in paragraph 1 of this Article and if it determines that there is a need, shall adopt a decision on the restriction of the conditions for the use of radio frequency spectrum from an individual license, which shall contain the following:

- 1) the radio frequency spectrum to which the restriction applies;
- 2) the geographical area to which the restriction applies;
- 3) the time period to which the restriction applies;
- 4) the justification for the requested restriction;
- 5) the period within which the individual license holder is obliged to comply with the restriction.

In the event of restrictions on the conditions of use of the radio frequency spectrum for individual licenses referred to in Article 105 of the Law, the Regulator shall conduct a public consultation procedure in accordance with Articles 36 and 37 of the Law.

By way of exception to the provision of paragraph 4 of this Article, public consultations shall not be conducted if the individual license holder agrees with the proposed restriction.

In the cases referred to in paragraph 1 of this Article, the Regulator shall issue a new individual license, in accordance with the applied restrictions.

## **13. Method and procedure for amending the conditions of use of the radio frequency spectrum**

### **Article 16.**

The Regulator may amend the conditions for the use of the radio frequency spectrum from an individual license, as well as the assigned radio frequency spectrum, only in objectively justified cases and in a proportionate manner, taking into account, if applicable, the conditions related to the right to transfer the radio frequency spectrum.

The Regulator may adopt a decision to amend the conditions for the use of the radio frequency spectrum from an individual license to:

1) reduce interference that endangers the operation of other radiocommunication services;

2) protect people from electromagnetic radiation;

3) achieve more effective and efficient use of the radio frequency spectrum in cases of danger and other emergencies, i.e. in the event of a state of emergency or war.

In the case referred to in paragraph 1 of this Article, the Regulator shall adopt a decision to issue a new individual license.

The decision referred to in the previous paragraph of this Article shall contain:

1) the amended conditions for the use of the radio frequency spectrum;

2) the reasons for amending the conditions for the use of the radio frequency spectrum;

3) the deadline within which the individual license holder is obliged to comply with certain restrictions.

Exceptionally from the cases referred to in paragraph 2 of this Article, the Regulator may adopt a decision to amend the conditions for the use of the radio frequency spectrum, if compliance with the conditions of the individual license is not possible, as well as if the impossibility of doing so is stated in a written, reasoned request by the individual license holder.

The Regulator shall conduct a public consultation procedure on the proposal for amending the conditions for the use of the radio frequency spectrum for electronic communications networks and services in accordance with Articles 36 and 37 of the Law, within a period that may not be shorter than 30 days, except in exceptional cases.

By way of exception to the provision in paragraph 6 of this Article, public consultations shall not be conducted if the changes to the conditions for the use of the radio frequency spectrum are of minor importance and if the individual license holder agrees with the proposed amendments.

## **14. Manner and conditions for mandatory identification of certain classes of radio stations**

### **Article 17.**

Identification of radio stations, i.e. program identification, as well as the name of the program service is an obligation for radio stations in the broadcasting service, in the manner and under the conditions prescribed in the Technical Documentation, enclosed in Annex 2.

## **15. Manner and conditions of use of radio stations in case of danger and other emergencies**

### **Article 18.**

Danger signals, messages and announcements, which are broadcast in case of danger and other emergencies, in case of natural disasters or when saving human lives, have priority in transmission via all radio stations.

In the cases referred to in paragraph 1 of this Article, it is permitted, in addition to the assigned radio frequencies and the established conditions for the operation of the radio station, to use other radio frequencies to employ them in the most appropriate manner.

The holder of an individual license, who receives the danger signals referred to in paragraph 1 of this Article, is obliged to respond to the call and make his radio station available.

To determine the conditions and methods of using radio stations in case of danger and other emergencies, pre-established procedures between the Regulator, the emergency intervention service and the competent services in the ministry responsible for internal affairs shall be applied, so that the radio stations are used in a timely and purposeful manner in given cases.

### **III. GENERAL PROCEDURE FOR CONDUCTING PUBLIC TENDER**

#### **1. Public bidding documentation**

##### **Article 19.**

The Regulator shall prepare the public bidding documentation in the Serbian language.

The Regulator shall specify and clarify in the public tender documentation the conditions, requirements and other elements from the public notice, the public tender procedure, the method of submitting the bid, the deadlines for individual stages of the procedure, the criteria for evaluating bids, the method of determining the most favorable bid, payment instructions, as well as the issuance of an individual license based on the conducted public bidding procedure.

The Regulator shall determine the fee for the purchase of public tender documentation in accordance with the general act prescribing the amount and method of payment of fees for providing services within the competence of the Regulator.

#### **2. Public bidding procedure**

##### **Article 20.**

An application for participation in the public bidding procedure for issuing an individual license shall be submitted in the Serbian language, in writing or in another appropriate manner according to the conditions set out in the public notice, within a period that may not be shorter than 45 days from the date of publication of the public notice.

The public notice referred to in paragraph 1 of this Article shall contain the conditions set out in Article 105, paragraph 7 of the Law and shall be published in accordance with Article 105, paragraph 8 of the Law.

The Regulator shall consider applications submitted in a timely manner and verify the fulfillment of the conditions for participation in the public bidding procedure, which are set out in the public notice and the public bidding documentation, and shall publish a list of persons who will participate in the public bidding procedure.

##### **Article 21.**

The public bidding procedure shall be carried out in the manner prescribed in the public notice and in the public bidding documentation.

The Regulator shall issue a decision determining the results achieved in the public bidding procedure, i.e. the list of persons who have met the conditions for the assignment of radio frequency spectrum.

### **3. Issuance of an individual license based on a public bidding procedure**

#### **Article 22.**

The Regulator shall issue an individual license based on the decision referred to in Article 21, paragraph 2 of this Rulebook and proof of payment of the fee for the right to use the radio frequency spectrum, which is paid for the issuance of an individual license based on a public tender procedure in accordance with the dynamics and in the manner established in the general act prescribing the minimum conditions for the issuance of individual licenses based on a public tender procedure.

An individual license based on a public tender procedure shall be issued by decision.

The Regulator shall make a decision on the issuance of an individual license referred to in the previous paragraph of this Article, no later than eight months from the date of expiry of the deadline for submitting applications, which is prescribed in the public notice.

### **4. Content of an individual license based on a public bidding procedure**

#### **Article 23.**

An individual license issued based on a public tender procedure shall contain data on:

- 1) the individual license holder;
- 2) the assigned radio frequencies, i.e. radio frequency spectrum;
- 3) the duration of the individual license;
- 4) the locations, i.e. coverage areas;
- 5) the type of radio communication service, as well as data depending on the type of radio communication service;
- 6) the method and conditions for mandatory identification of certain types of radio stations;
- 7) the amount of the fee for the right to use the radio frequency spectrum, the method and dynamics of its payment;
- 8) as well as the conditions in accordance with the general act prescribing the minimum conditions for issuing individual licenses on the basis of a public tender procedure pursuant to Article 105, paragraph 3 of the Law and the documentation referred to in Article 19 of this Rulebook.

The individual license referred to in paragraph 1 of this Article may also contain other data, if such data is related to the prescribed conditions for issuing an individual license or arises from relevant international agreements.

## **IV. METHOD AND CONDITIONS FOR THE NOTIFICATION OF RADIO STATIONS**

#### **Article 24.**

The holder of an individual license issued based on a public tender procedure, in accordance with Article 105, paragraph 12 of the Law, is obliged to notify each radio station on the public mobile and/or fixed electronic communications network. Notified radio stations referred to in paragraph 1 of this Article shall be deleted from the register of notified radio stations on the date of termination of the validity of the individual license referred to in paragraph 1 of this Article.

### **Article 25.**

A radio station in a public mobile and/or fixed electronic network, referred to in Article 24, paragraph 1 of this Rulebook, is defined, for the purposes of this Rulebook, by its location, the azimuth of maximum radiation of the transmitting antenna (in the case of 5G multi-beam antennas, the physical azimuth is taken), the radio frequency band in which the signal is transmitted/received, the technology used, as well as other parameters.

## **1. Radio station notification procedure**

### **Article 26.**

The request for notification of radio stations in the public mobile and/or fixed electronic communications network shall be submitted on a duly completed ERS Form, enclosed in Annex 4, which is printed with this Rulebook and represents an integral part thereof.

The request for notification of radio stations shall be accompanied by data for all radio stations in the public mobile and/or fixed electronic network, in the form of a Table of Parameters for Radio Stations to be Notified (hereinafter: the Table), which is part of Annex 4, and which defines the set of technical and other parameters that need to be submitted.

The Regulator shall notify the applicant for notification of a radio station to amend and adjust one or more parameters of the radio station from the Table, which is part of Annex 4, within eight days, or to supplement the application if:

- 1) the conditions from the general act prescribing the requirements for determining the protection zones of electronic communications networks and associated assets, certain radio centers and radio stations, as well as radio corridors and the obligations of the investor of works during the construction or reconstruction of facilities are not met,
- 2) the submitted application is incomplete.

After determining that the conditions for notifying radio stations have been met, the Regulator shall deliver a notification to the user, which shall include: the number of radio stations being notified for the first time, the number of radio stations on which parameter changes have been made, the amount of the fee for notifying radio stations and instructions for the payment thereof, as well as a request to submit other data of importance in the procedure for notifying radio stations, if necessary.

Changing the parameters referred to in paragraph 4 of this Article shall mean changing one or more of the following radio station parameters: antenna azimuth, antenna height, antenna main beam width angle, total antenna tilt, antenna gain, power value. All the above parameters are set out in the Table, which is part of Annex 4.

The Regulator shall decide on the notification of radio stations within ten days from the date of receipt of a duly completed application, with proof of payment of the fee for the notification of radio stations.

## **2. Fulfillment of the conditions for using non-ionizing radiation sources**

### **Article 27.**

The Regulator, upon completion of the radio station notification procedure for each month, shall notify the competent environmental protection authority of the notified radio stations and shall submit data on them.

The Regulator shall provide the competent environmental protection authority with access to the database of notified radio stations with all parameters submitted in the radio station notification procedure.

## **3. Period for which radio stations are recorded**

### **Article 28.**

Radio stations notification is carried out on a monthly basis, so that the holder of an individual license referred to in Article 24, paragraph 1 of this Rulebook is obliged to submit technical and other parameters of all radio stations in the network for the previous month by the tenth of the month, with the status as of the last day of the previous month. The parameters shall be submitted for all active radio stations, as well as for those that were temporarily active in the previous month, despite being inactive at the time of notification.

Before submitting a request for notification of radio stations referred to in paragraph 1 of this Article, i.e. no later than ten days before the planned date of commencement of use, the holder of an individual license referred to in paragraph 1 of this Article shall be obliged to notify the Regulator of temporarily active radio stations that will be used continuously for less than 15 days and to submit data on the technology used, the location of the transmitter and the date of commencement and cessation of use of the radio stations.

## **4. Rejection of requests for notification of radio stations**

### **Article 29.**

The Regulator may reject a request for notification of one or more radio stations if the following conditions are not met:

- 1) from the general act prescribing the requirements for determining the protection zones of electronic communication networks and associated assets, certain radio centers and radio stations, as well as radio corridors and the obligations of the investor of works during the construction or reconstruction of facilities,
- 2) in terms of protecting human health from exposure to non-ionizing radiation, and
- 3) for other objective and non-discriminatory reasons.

## **5. Deleting notified radio stations**

### **Article 30.**

The Regulator shall delete a notified radio station from the register of notified radio stations if:

1) a decision is made in the inspection procedure to prohibit the operation of the radio station, because it has been established that the operation of the radio station poses an immediate and serious threat to public safety or endangers the environment, or if it has been established that the radio frequency spectrum is being used without authorization, contrary to the conditions of use;

2) the competent authority for environmental protection determines that the conditions for the use of non-ionizing radiation sources have not been met;

3) it is determined that incorrect data were provided when applying for notification of the radio station.

The Regulator shall decide to delete a notified radio station from the register of notified radio stations, and shall notify the holder of the individual license, which was issued based on a public tender procedure, at whose request the radio station was notified.

### **Article 31.**

Notified radio stations are subject to radio frequency spectrum monitoring, as are other types of radio stations, in accordance with the general act regulating the method of monitoring the use of the radio frequency spectrum, performing technical inspections and protecting against interference.

### **Article 32.**

The amount and method of payment of the fee for notifying radio stations in the public mobile and/or fixed electronic network shall be determined by the Regulator according to the type of service provided, in accordance with the general act prescribing the amount and method of payment of fees for providing services within the competence of the Regulator.

### **Article 33.**

The holder of an individual license issued in a public tender procedure is obliged, at the request of the Regulator, to submit technical and other data, as well as technical specifications for notified radio stations, when necessary for the purpose of protection against interference and for monitoring the use of the radio frequency spectrum, or for the purposes of calculating signal coverage and other analyses.

### **Article 34.**

The Regulator shall maintain an up-to-date register of notified radio stations on its website.

The maps of mobile network coverage in the Republic of Serbia, which the Regulator displays on its website within the interactive portal, shall be updated based on data on radio stations from the register of notified radio stations.

## V. TRANSITIONAL AND FINAL PROVISIONS

### Article 35.

The Regulator is obliged to establish a register of notified radio stations, as well as to provide appropriate technical conditions necessary for the procedure of notifying radio stations.

The holder of an individual license, issued on the basis of a public tender procedure for radio stations, for which he obtained an individual license for the use of radio frequencies, i.e. radio frequency spectrum, in accordance with the provisions of the Law on Electronic Communications ("Official Gazette of the Republic of Serbia", Nos. 44/10, 60/13 – CC, 62/14 and 95/18 – other law), is obliged to submit data for these radio stations to the Regulator in the procedure of notifying radio stations, as well as to indicate the number of the individual license and the date of its termination of validity for each radio station, whereby data relating to the environmental impact assessment referred to in Article 27 of these Regulations need not be submitted.

For the notification of radio stations, referred to in paragraph 2 of this Article, the fee for the notification of radio stations shall not be paid until the expiry of the period for which the individual license for the use of radio frequencies, i.e. the radio frequency spectrum, was issued, i.e. until the technical parameters of the notified radio station are changed.

### Article 36.

On the date of entry into force of this Rulebook, the Rulebook on application forms for issuing individual licenses for the use of radio frequencies ("Official Gazette of the Republic of Serbia", No. 37/21) shall cease to be valid.

### Article 37.

This Rulebook shall enter into force on the eighth day from the date of its publication in the "Official Gazette of the Republic of Serbia", except for the provisions of Articles 24-34 of this Rulebook, which shall apply from 1 March 2025.
