

## **AGREEMENT**

**on frequency coordination of digital terrestrial television (DTT)**

**in the frequency band 470-694 MHz between**

**Administration of Bulgaria and Administration of the Republic of Serbia**

### **Preamble**

#### **Article 1**

This document describes a bilateral coordination agreement between Administration of Bulgaria and Administration of the Republic of Serbia (hereinafter: Agreement). Furthermore, it expresses in particular the convergence of will between both parties, indicating an intended common course of action.

### **Background**

#### **Article 2**

In relation with decisions of the WRC-15 about usage of radio frequency band 694-790 MHz (allocation of this band on co-primary base to the Broadcasting and the Mobile Service) following provisions of the Decision (EU) 2017/899 of the European Parliament and of the Council of 17 May 2017 on the use of the 470-790 MHz frequency band in the Union (hereinafter: Decision (EU) 2017/899), Administration of Bulgaria and Administration of the Republic of Serbia decided to perform the re-planning of the frequency band 470-694 MHz in order to enable future use of digital terrestrial television (hereinafter: DTT) networks and to facilitate the re-farming of the frequency band 694-790 MHz for terrestrial systems capable of providing wireless broadband electronic communications services and for flexible national use.

### **Objectives**

#### **Article 3**

Administration of Bulgaria and Administration of the Republic of Serbia successfully facilitated bilateral frequency coordination activities in order to implement the relevant broadcasting spectrum reallocation, with a view to:

- achieve mutual compatibility of the DTT spectrum resources to be used in the UHF band and avoid mutual harmful interference;

- facilitate any consequential modifications to the Geneva 2006 (hereinafter: GE06) Plan.

## **Distribution of channels**

### **Article 4**

Administration of Bulgaria and Administration of the Republic of Serbia agreed on distribution of channels, where respective areas and their assigned channels are specified in the Annex 1 and the Annex 2 of this Agreement.

## **Technical parameters of assignments**

### **Article 5**

Administration of Bulgaria and Administration of the Republic of Serbia agreed on the new allotments and the use of radio-frequencies for the assignments with technical parameters given in the Annex 3 - for Administration of the Republic of Serbia and the Annex 4 – for Administration of Bulgaria of this Agreement.

The detailed technical parameters for these assignments are recorded on the CD, one for each Administration, in electronic format (Terrasys notices) in the files:

for Administration of Bulgaria:

- “**BUL\_Plan\_2017\_New\_allotments.txt**“ for the new allotments;
- “**BUL\_Plan\_2017\_New\_assignments.txt**“ for the new assignments.,

for Administration of the Republic of Serbia:

- “**SRB\_Allotment\_NEW\_06112017.txt**“,
- “**SRB\_Plan\_2017\_new\_assignments.txt**“,

which are given in the Annex 5 of this Agreement.

## **ITU coordination and notification**

### **Article 6**

Administration of Bulgaria and Administration of the Republic of Serbia agree that they will not object to coordination requests for addition of the new allotments and radio-frequencies (assignments) subject of the Annex 3 and the Annex 4 of this Agreement, submitted to the ITU in the application of the Article 4 of GE06 Agreement.

## **Transition period**

### **Article 7**

The implementation of the agreed DTT requirements will be done gradually in the transition period which will start on the date of signing the Agreement.

As the Republic of Serbia has not yet officially decided about the usage of the 694-790 MHz frequency bands for terrestrial systems capable of providing wireless broadband electronic communications services, and noting the request of Bulgaria in the light of the Decision of the European Parliament and the Council (Decision (EU) 2017/899) regarding the use of the 470-790 MHz frequency band in the EU, both Parties should additionally agree, before June 30<sup>th</sup>, 2020, on a final date of the transition period.

All the DTT assignments of signing Administrations above 694 MHz within the territories of the Republic of Bulgaria and the Republic of Serbia shall not be used after the end of the transition period.

### **Revision of the Agreement**

#### **Article 8**

With the consent of the other signing Administration, this Agreement may be modified at the request of one of the signatory Administration where such a modification becomes necessary in the light of administrative, regulatory or technical developments.

An Administration cannot withdraw unilaterally from this Agreement.

### **Language of the Agreement**

#### **Article 9**

This Agreement exists in two original versions in English. Each Administration holds one original.

### **Entry into force**

#### **Article 10**

This Agreement will enter into force on the date of the signature.

#### Attachments:

- Annex 1: Channel distribution of the new DTT plan of Administration of the Republic of Serbia.
- Annex 2: Channel distribution of the new DTT plan of Administration of Bulgaria

- Annex 3: Technical parameters of new allotments and assignments of Administration of the Republic of Serbia
- Annex 4: Technical parameters of new allotments and assignments of Administration of Bulgaria
- Annex 5: CD with BUL and SRB TerraSys files
