

AGREEMENT
on frequency coordination of digital terrestrial television (DTT)
in the frequency band 470-694 MHz
between
Administration of the Republic of Serbia and Administration of Hungary

Preamble

Article 1

This document describes a bilateral coordination agreement between Administration of the Republic of Serbia and Administration of Hungary (hereinafter: Agreement). Furthermore, it expresses in particular the convergence of will between both parties, indicating an intended common course of action.

Background

Article 2

In relation with decisions of the WRC-15 about usage of radio frequency band 694-790 MHz (allocation of this band on co-primary base to the Broadcasting and the Mobile Service) following provisions of the Decision (EU) 2017/899 of the European Parliament and of the Council of 17 May 2017 on the use of the 470-790 MHz frequency band in the Union (hereinafter: Decision (EU) 2017/899), Administration of Serbia and Administration of Hungary decided to perform the re-planning of the frequency band 470-694 MHz in order to enable future use digital terrestrial television (hereinafter: DTT) networks and to facilitate the re-farming of the frequency band 694-790 MHz for terrestrial systems capable of providing wireless broadband electronic communications services.

Taking into account the different quantitative and qualitative requirements on the future DTT use in the frequency band 470-694 MHz, the equitable access to the frequency spectrum, the technical challenges, the possibility of harmful interference and other factors, Administration of Hungary and Administration of the Republic of Serbia decided to use commonly agreed principles as shall be presented in Multilateral Framework Agreement between the administrations of Albania, Austria, Bosnia and Herzegovina, Bulgaria, Croatia, Greece, Former Yugoslav Republic of Macedonia, Montenegro, Hungary, Romania, the Republic of Serbia, Slovenia, Turkey and Ukraine on the frequency plan for the future digital terrestrial television in the frequency band 470-694 MHz which shall be signed on 6th December 2017, in order to facilitate the re-planning process and achieve a compatible frequency plan between the concerned administrations within the defined geographical area.

Objectives

Article 3

Administration of Hungary and Administration of the Republic of Serbia successfully facilitated bilateral frequency coordination activities in order to implement the relevant broadcasting spectrum reallocation, with a view to:

- achieve mutual compatibility of the DTT spectrum resources to be used in the UHF band and avoid mutual harmful interference;
- facilitate any consequential modifications to the Geneva 2006 (hereinafter: GE06) Plan.

Distribution of channels

Article 4

With this agreement the Administrations of the Republic of Serbia and Hungary establish a frequency plan which is visualized in **Annex 1** and **Annex 2**. The **Annex 1** and **Annex 2** represent the areas and channel positions for Digital Terrestrial Television in the band 470 – 694 MHz.

Technical parameters of assignments

Article 5

Administration of Hungary and Administration of the Republic of Serbia agreed on the use of radio-frequencies for the new assignments not stemming from the GE 06 Plan given in **Annex 3** and **Annex 4** of this Agreement.

The detailed technical parameters for these assignments are recorded on a CD, one for each Administration, in electronic format (Terrasys notices) in the files:

- “**Srb_new_06112017.txt**“ for Administration of the Republic of Serbia
- “**HNG_NEW_ASSIGNMENTS_6_LAYER_08112017.txt**“ for Administration of Hungary

given in the **Annex 5** (CD)

ITU coordination and notification

Article 6

The current GE06 frequency Plan will be updated by the Administrations according to the Article 4 of the GE06 Agreement and notification procedure based on this Agreement.

Administration of Hungary and Administration of the Republic of Serbia agree that they will not object the new assignments subject of the **Annex 3** and the **Annex 4** of this Agreement with the technical parameters recorded on the CD described in Article 5.

The withdrawal of the GE06 allotments and associated assignments from the GE06 Plan as it is on the date of signature in the 470-862 MHz band will be done according to Article 4 of the GE06 Agreement later considering the agreements with third administrations as well.

Transition period

Article 7

Noting that:

- the Republic of Serbia has not yet officially decided about the usage of the 694-790 MHz frequency bands for terrestrial systems capable of providing wireless broadband electronic communications services
- Hungary intends to use the 694-790 MHz band systems implemented in line with Commission Implementing Decision (EU) 2016/687 of 28 April 2016 on the harmonisation of the 694-790 MHz frequency band for terrestrial systems capable of providing wireless broadband electronic communications services and for flexible national use in the Union.

Parties should agree before 31 December 2019 on the starting and ending date of the transition period.

The new DTT assignments given in **Annex 3** and **Annex 4** of this Agreement can be implemented in the band 470-694 MHz when an agreement regarding the starting and ending date of the transition period will enter into force.

Administrations shall inform each other on the date of bring into use of assignments subject to this Agreement at least 2 (two) months before the respective station will be put into operation.

Administration of Hungary and Administration of the Republic of Serbia will contribute, with their best effort to conduct a smooth transition according to this Agreement, with the least possible adverse effects for the audience of DTT.

Revision of the Agreement

Article 8

An Administration cannot terminate or modify unilaterally from this Agreement.

All further future national developments in the frequency band 470 - 694 MHz will be done according Article 4 of the GE06 Agreement.

Language of the Agreement

Article 9

This Agreement exists in two original versions in English. Each Administration holds one original.

Entry into force

Article 10

This Agreement enters into force on the date when an agreement in accordance with Article 7 regarding the starting and ending date of the transition period will enter into force.

If there is no agreement according to the Article 7 this Agreement enters into force for signatory Administration only on the date when the 694-790 MHz band is released from DTT in the respective country.

Administrations shall inform each other on the date of switching off the broadcasting stations at least 2 (two) months before the stations in the 694-790 MHz band will finish the operation.

Place: Budapest, Hungary
